Clinical and translational perspectives in pancreatic surgery

May 9, 2025 | 14:00 CEST

[Link to Zoom](#)

Pancreatic surgery presents unique challenges that demand both innovative clinical approaches and translational research insights. In this talk, Christoph Michalski from the University Hospital Heidelberg will explore the evolving landscape of pancreatic surgery, highlighting key clinical strategies and recent scientific advances that are shaping patient outcomes.

He will also present specialized expertise and groundbreaking programs that position Heidelberg as a leading center in this field. The lecture aims to provide an integrated view of how clinical excellence and research innovation drive progress in pancreatic surgical oncology.

Christoph Michalski is the Director of the Department of General, Visceral, and Transplant Surgery at Heidelberg University Hospital and holds the Chair of Surgery at Heidelberg University. An internationally recognized expert in complex surgical oncology, he specializes in pancreatic, liver, and gastrointestinal surgery, including advanced minimally invasive techniques, including and robotic-assisted procedures. His research focuses on pancreatic cancer, gastrointestinal oncology, and digital innovations in surgery.

Before returning to Heidelberg in 2023, he held positions at leading institutions in Germany and the U.S. He is committed to advancing interdisciplinary and patient-centered surgical oncology.
